# DISCLAIMERS

---

## 10% CABINETRY DISCLAIMERS

### ENVIRONMENTAL IMPACT STATEMENT

In ordinary circumstances, wood inherently contains moisture and readily interacts with its surrounding environment. This phenomenon persists even after the application of finishes. While finishing treatments can mitigate this process, wood remains responsive to fluctuations in humidity levels. Elevated humidity prompts wood to expand as it absorbs moisture, whereas low humidity causes contraction through moisture loss. Notably, wood dimensions remain stable unless humidity levels fluctuate. High humidity predominantly affects wood width and thickness, with minor dimensional adjustments occurring with typical humidity variations. Maintaining household humidity levels between 40% and 50% is advisable to mitigate environmental effects on cabinetry. Extreme humidity fluctuations exceeding 80% or dropping below 20% can induce detrimental outcomes. Wood performs optimally within controlled environments, and issues such as warping often stem from inadequate site storage, suboptimal installation practices, or environmental factors. Moisture-related consequences may include panel expansion or contraction, joint separation (particularly in metered doors), and warping of frame stiles and rails. Instances of product failure are more pronounced in high-moisture settings such as waterfront properties and coastal regions, underscoring the importance of moisture control to preserve 10% Cabinetry. Doors with 5-piece construction are engineered to accommodate panel expansion and contraction.

### PAINTED WOOD CABINETS

Expansion and contraction dynamics can result in visible joint lines in painted cabinetry finishes, a phenomenon deemed normal within the kitchen cabinet industry. While open joint lines do not constitute defects and do not compromise structural integrity, they are an inherent characteristic of painted all wood cabinets, including those from 10% Cabinetry. Variability in wood behavior may lead to differing expansion and contraction patterns among cabinets or within individual joints. Exposure to water or high moisture levels can damage exposed wood joints, emphasizing the importance of promptly removing excess moisture from cabinet surfaces.

### STAINED WOOD CABINETS

Solid wood cabinets may exhibit expansion or contraction in response to temperature and humidity fluctuations, with contraction potentially causing visible unfinished lines during colder months or low humidity periods. To mitigate these lines, pigment furniture polish can be applied. Touch-up kits are available for purchase through 10% Cabinetry dealers. Variation in wood color and appearance is inherent due to the natural characteristics of wood, necessitating an understanding that each product may vary slightly in color and appearance.

### DISCOLORATION CONCERNS

Painted surfaces, particularly lighter hues, are susceptible to discoloration from airborne particles generated by cooking, grilling, smoking, and other sources. Prolonged exposure to natural or artificial light may also alter finish colors, while moisture can contribute to discoloration.

### INSTALLATION CONSIDERATIONS

Precise squaring of base cabinets during installation is essential for optimal drawer alignment and should be verified before countertop installation.

## **LIGHT EXPOSURE**

Exposure to light can induce color changes in real wood over a short period. It's crucial to recognize that samples or displays may reflect aged wood, providing an approximation of cabinet appearance over time rather than representing freshly produced cabinets. Conversely, newly produced samples may closely resemble the appearance of freshly produced cabinets but may not accurately depict how they will appear when aged.

# NKBA GUIDELINES

## NKBA KITCHEN GUIDELINES

### **DOOR/ENTRY**

A doorway should be at least 32" wide.

### **DOOR INTERFERENCE**

No entry door should interfere with appliances, nor should appliance doors interfere with one another.

### **DISTANCE BETWEEN WORK CENTERS**

In a kitchen with three work centers (cooking, cleanup/prep and refrigeration), the sum of the distances between them should total no more than 26'. No leg of the work triangle should measure less than 4' nor more than 9'.

When the kitchen includes additional work centers, each additional distance should measure no less than 4' nor more than 9'. No work triangle leg should intersect an island or peninsula by more than 12".

### **SEPARATING WORK CENTERS**

A full-height, full-depth, tall obstacle [i.e., a pantry cabinet or refrigerator] should not separate two primary work centers.

### **WORK TRIANGLE TRAFIC:**

No major traffic patterns should cross through the work triangle.

### **WORK AISLE**

The width of a work aisle should be at least 42" for one cook and at least 48" for multiple cooks.

### **WALKWAY**

The width of a walkway should be at least 36".

### **TRAFFIC CLEARANCE AT SEATING**

In a seating area where no traffic passes behind a seated diner, allow 32" of clearance from the counter/table edge to any wall or other obstruction behind the seating area. If traffic passes behind the seated diner, allow at least 36" to edge past or at least 44" to walk past.

### **SEATING CLEARANCE**

At 30" high tables/counters, at least allow a 24" wide by 18" deep knee space for each seated diner.

At 36" high counters, at least allow a 24" wide by 15" deep knee space.

At 42" high counters, at least allow a 24" wide by 12" deep knee space.

### **CLEANUP/PREP SINK PLACEMENT**

If a kitchen has only one sink, locate it adjacent to or across from the cooking surface and refrigerator.

### **CLEANUP/PREP SINK LANDING AREA**

Include at least a 24" wide landing area to one side of the sink and at least an 18" wide landing area on the other side.

### **PREPARATION/WORK AREA**

Include a section of continuous countertop at least 36" wide and 24" deep immediately next to a sink.

### **DISHWASHER PLACEMENT**

Locate nearest edge of the primary dishwasher within 36" of the nearest edge of a sink. Provide at least 21" of standing space between the edge of the dishwasher and countertop frontage, appliances and/or cabinets placed at a right angle to the dishwasher.

### **WASTE RECEPTACLES**

Include at least two waste receptacles. Locate one near the sink(s) and a second for recycling in the kitchen or nearby.

### **AUXILIARY SINK**

At least 3" of countertop frontage should be provided on one side of the auxiliary sink and 18" on the other side.

**REFRIGERATOR LANDING AREA**

Include at least 15" of landing area on the handle side of the refrigerator / on either side of a side-by-side refrigerator.  
At least 15" of landing area no more than 48" across from the front of the refrigerator.  
At least 15" of landing area above or adjacent to any undercounter refrigeration appliance.

**COOKING SURFACE LANDING AREA**

Include a minimum of 12" of landing area on one side of a cooking surface and 15" on the other side.  
In an island or peninsula, the countertop should also be extended a minimum of 9" behind the cooking surface.

**COOKING SURFACE CLEARANCE**

Allow 24" of clearance between the cooking surface and a protected noncombustible surface [e.g., a range hood] above it.  
At least 30" of clearance is required between the cooking surface and an unprotected/combustible surface above it.  
If a microwave hood is used, then the manufacturer's specifications should be followed.

**COOKING SURFACE VENTILATION**

Provide a correctly sized, ducted ventilation system for all cooking surface appliances; the recommended minimum is 150 CFM.

**COOKING SURFACE SAFETY**

Do not locate the cooking surface under an operable window. Window treatments above the cooking surface should not use flammable materials. A fire extinguisher should be located near the exit of the kitchen away from cooking equipment.

**MICROWAVE OVEN PLACEMENT**

The ideal location for the bottom of the microwave is 3" below the principle user's shoulder but no more than 54" above the floor.  
If the microwave is below the countertop the bottom must be at least 15" off the finished floor.

**MICROWAVE LANDING AREA**

Provide at least a 15" landing area above, below or adjacent to the handle side of a microwave.

**OVEN LANDING AREA**

Include at least a 15" landing area next to or above the oven.  
At least a 15" landing area not more than 48" across from the oven is acceptable if the appliance does not open into a walkway.

**COMBINING LANDING AREAS**

If two landing areas are adjacent, determine a new minimum by taking the longer of the two areas requirements and adding 12".

**COUNTERTOP SPACE**

A total of 158" of countertop frontage, 24" deep, with at least 15" of clearance above, is needed to accommodate all uses.

**COUNTERTOP EDGES**

Specify clipped or round corners rather than sharp edges.

**STORAGE**

The total shelf/drawer frontage is:  
1,400" for a small kitchen (150 square feet or less);  
1,700" for a medium kitchen (151 to 350 square feet);  
2,000" for a large kitchen (351 square feet or more). \*See Chart.

**STORAGE**

CABINET TYPE	SMALL	MEDIUM	LARGE
Wall	300"	360"	360"
Base	520"	615"	660"
Drawer	360"	400"	525"
Pantry	180"	230"	310"
Misc.	40"	95"	145"

**STORAGE AT CLEANUP/PREP SINK**

Of the total recommended shelf/drawer frontage, the following should be located within 72" of the centerline of the main sink:  
At least 400" for a small kitchen; at least 480" for a medium kitchen; at least 560" for a large kitchen.

**CORNER CABINET STORAGE**

At least one corner cabinet should include a functional storage device. This does not apply if there are no corner cabinets.

**ELECTRICAL RECEPTACLES**

GFCI (ground fault circuit interrupter) protection is required on all receptacles servicing countertop surfaces.

**LIGHTING**

Every work surface should be well-illuminated by appropriate task lighting.

# SPECIFICATION

---

## SPECIFICATION INSTALLATION GUIDE

### .84" TOP ALIGNMENT CABINET INSTALLATION

- 84" top alignment cabinet installation includes standard Wall cabinets (30" high) installed 54" above the finished floor, allowing 18" clearance between the Wall cabinets and a standard countertop height of 36".
- Tall cabinetry (Linen, Pantry, Oven) is 84" high.
- When selecting cabinetry for installation above or near any appliance, refer to the appliance.

### .90" TOP ALIGNMENT CABINET INSTALLATION

- 90" top alignment cabinet installation includes taller Wall cabinets (36" high) installed 54" above the finished floor, allowing 18" clearance between the Wall cabinets and a standard countertop height of 36".
- Tall cabinetry (Pantry, Oven) is 90" high.
- When selecting cabinetry for installation above or near any appliance, refer to the appliance manufacturer's specifications for clearance and venting requirements.

### .96" TOP ALIGNMENT CABINET INSTALLATION

- 96" top alignment cabinet installation includes full-height Wall cabinets (42" high) installed 54" above the finished floor, allowing 18" clearance between the Wall cabinets and a standard countertop height of 36".
- Tall cabinetry (Pantry, Oven) is 96" high.
- When selecting cabinetry for installation above or near any appliance, refer to the appliance manufacturer's specifications for clearance and venting requirements.

# OC. SPECIFICATION

## SPECIFICATION FOR OVEN CABINET

Tall Oven Cabinets come with single fixed shelf above top drawer.

Fixed shelf will be located above the uppermost drawer; location is based on the selected configurations: Single, Combo, Double.

Frame is to be trimmed on site to accommodate configuration & appliance needs.

### WHEN USING A SINGLE OVEN

- Wide rails face from the trimmed on side
- Minimum width opening 27"
- Maximum cut out width 31"
- Minimum height opening 28 1/2"
- Maximum cut out height is 37"
- Maximum overall oven height 37 1/2"

### WHEN USING A COMBO OVEN

- Wide rails face frame to be trimmed on side
- Minimum width opening 27"
- Maximum cut out width 31"
- Minimum cut out height 39 3/8"
- Maximum cut out height is 44"
- Maximum overall oven height 44 5/8"

### WHEN USING A DOUBLE OVEN

- Wide rails face frame to be trimmed on side
- Minimum width opening 27"
- Maximum cut out width 31"
- Minimum cut out height is 50 3/4"
- Maximum cut out height is 55 1/2"
- Maximum overall oven height 56"

### WHEN USING TWO APPLIANCES

- Will need to insert a filler and fixed shelf to support top appliance, filler and shelf to be purchased separately.  
Please include size of oven cut out in your order.  
Full panel face frame to be trimmed on site (not by 10% Cabinetry)

**Note: To avoid damage to the frame & side panels, please apply extra care when cutting the front panel.**

# LW LIMITED 6 YEAR WARRANTY

10% Cabinetry warrants its Designer Series products to be free from defects in material or workmanship for a period of six years. 10% Cabinetry at their choice, may elect to repair or replace any 10% Cabinetry product covered by this warranty.

This warranty does not apply where items have been improperly stored or improperly installed. This warranty does not cover the following: costs of removing warranted material or the installation of replacement material, natural variations and aging inherent in wood, normal wear and tear or damage/defects caused by mistakes, abuse, negligence or modification in any way. This warranty does not apply to products purchased without finish.

10% Cabinetry reserves the right to inspect claimed defective products. No returns, replacements or repairs may be made without prior written consent. Some replacement parts may vary from those originally supplied and are subject to availability.

This warranty is the sole warranty of 10% Cabinetry and in lieu of all other warranties, express implied, including any implied warranty of merchantability and fitness for a particular use. Labor charges for removal of or installation of warranted material as well as incidental or consequential damages are excluded. We do not assume for us any other liability in connection with the sale of your product.

## WHAT IS NOT COVERED BY THIS WARRANTY?

- The natural aging or darkening of wood color, the wood knots, the inherent growth characteristics or variation in wood, We believe this is beauty of nature and not a defect. Absolutely NO RETURN / EXCHANGE for this kind of cabinets or accessories;
- Wear and tear, damage or defects cause by misuse, abuse, negligence, alteration, nonresidential use, storage, or use in non-controlled environment (Recommended 35%-55% humidity, temperature range 17-24°)
- Having a heating vent under or in front of cabinets
- Any product used or installed in connection with our products
- This warrants in not qualify for the final sales, clearance sales

## SPECIAL DOOR CONSIDERATIONS:

The purchaser agrees to let doors that we warped or have panel shrinkage a 1/4" or less to hang for one season (spring) before replacement is requested. Typically a door will return to its normal position once it is acclimated to temperature and humidity conditions. Prior to requesting a replacement for a door, please be sure the door has been installed properly. To file a claim on this warranty contact your local authorized 10% Cabinetry dealer.
